# getting care

Unlike traditional healthcare, getting care with Start is easy.

You can see any provider you'd like, but it might be a different process than you're used to.

## here's how it works:

### 01 FIND CARE

With our **search tool**, it's easy to find providers and facilities in your area. Considering the reimbursement amount associated with the care you wish to receive, utilize search results to find the **best care at the best price**.

### 02 UPLOAD RECEIPT

After receiving care, ask your provider or their staff for an **itemized receipt** for your visit. Simply upload your itemized receipt to your Start portal **within 90 days** of service. Start will then review your expense for reimbursement.

### 03 GET REIMBURSED

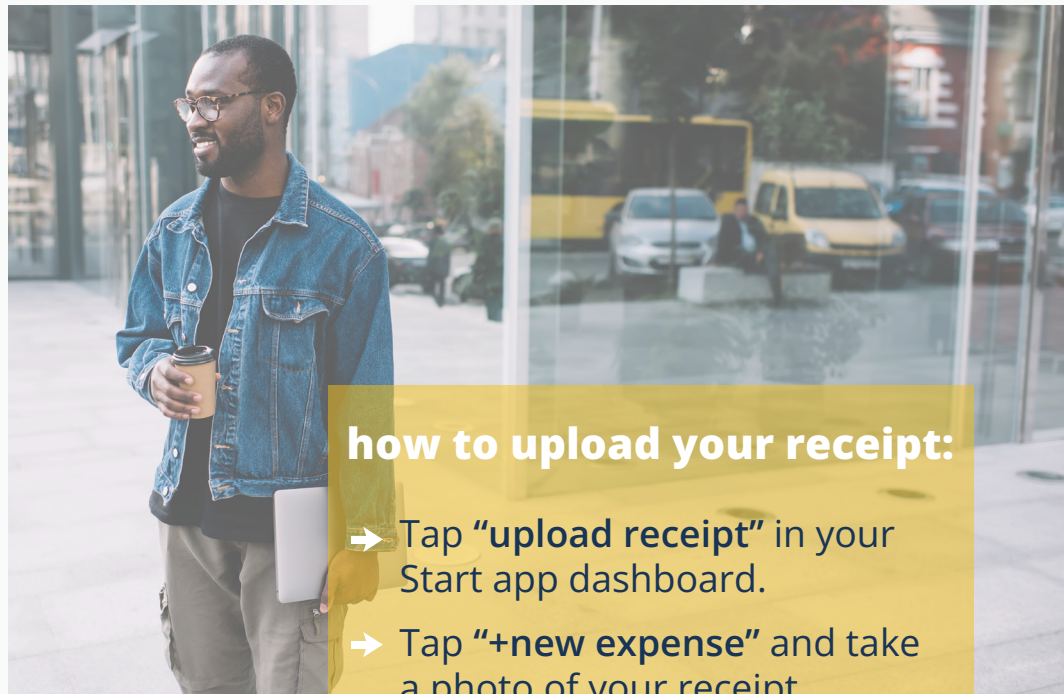

Once Start has reviewed and approved your expense, you'll be reimbursed at the set reimbursement rate associated with your service. Reimbursements will be **applied to your benefits**.

**goodbye, surprise bills.**

# speedy reimbursement

We pride ourselves on an "upload and done" claims process, meaning quick reimbursements and no surprise bills months down the road.

### how to upload your receipt:

- Tap "upload receipt" in your Start app dashboard.
- Tap "+new expense" and take a photo of your receipt.
- Provide details of your visit and **submit** your new expense form.
- Once approved, the Start reimbursement amount will be credited to you according to your benefits.
